(54) Title: CUTLERY SET ASSEMBLY

(57) Abstract: A cutlery set assembly is disclosed and comprises a knife (50) and a spoon (10) and/or a fork (30). The items of cutlery are made of resilient plastics material and each item of cutlery has a cylindrical handle. The handles are shaped such that they can be nested coaxially with each other. When in such a nested condition, the handle of the outermost item extends more than half way around the handle of the second item to hold the items in the nested condition. The resilience of the plastics material keeps the assembly together.
